

GUIDE · FIRST-TIME BUYERS

Your first home, *in four phases.*

Swipe

PHASE 1 · PREPARATION

02

Before you look at homes, *look at your numbers.*

- Check your credit report for errors early
- Aim for a debt-to-income ratio below 43%
- Hold off on opening new credit before you apply

TRY THE TOOL

Kwalifai's DTI calculator shows where you sit against common lender thresholds.

PHASE 2 · YOUR KWALIPASS™

03

Pre-qualify once.
Share it on your terms.

KwaliPass™ is a pre-qualification based on the information you provide, with an estimated loan range you can share with your agent.

- No SSN required to start
- Private until you choose to share it
- Ready to share with a single QR code

PHASE 3 · SHOP THE LOAN

04

Don't take *the first rate.*

- Compare APR, not just the interest rate
- Budget for closing costs, often 2% to 5% of the price
- Ask whether a rate buydown makes sense for you

PHASE 4 · CLOSING

05

Underwriting is *the home stretch.*

- Keep your bank balances steady
- Answer document requests within 24 hours
- Lock your rate when the timing works for you

> Rate Alerts can tell you when your target rate shows up, so you're not refreshing rate sites.

THE REAL MONTHLY NUMBER

06

Price isn't the payment. *PITI is.*

Principal, interest, taxes and insurance, plus HOA if there is one. Paste a listing into Property Cost Lookup to see the full monthly cost of a specific home.

From your numbers *to your keys.*
