INVESTOR CALCULATORS

02

Every one shows *where the deal breaks.*

Rental property
Your honest monthly number after every cost.

BRRRR
Cash back from the refi and cash flow after.

Fix & flip
Real profit and your break-even sale price.

Short-term rental
Fees, cleanings and break-even occupancy.

Multifamily
A unit-by-unit rent roll, 2 to 75 units.

DSCR
Does rent cover the payment? Max loan, solved.

FHA house hack
The FHA self-sufficiency test, pass or fail.

EXAMPLE · BRRRR

03

98% of the cash *came back.*

The fixer example: a $104K house, $38.5K rehab, appraising at $199K and renting for $2,495. The refinance returns $145,150 of the $148,700 put in, and it nets $312 a month.

WHERE IT BREAKS

Cash flow goes negative at a refinance rate above 10.30%.

EXAMPLE · FIX & FLIP

04

$37,269 profit, *until the price slips.*

A $182K fixer, $52K rehab, selling for $319K in 5 months. After every cost of buying, holding and selling, it keeps $37,269.

WHERE IT BREAKS

It turns into a loss at any sale price under $278,710. Each extra month costs about $3,118.

EXAMPLE · SHORT-TERM RENTAL

05

The cabin needs *60.4% booked.*

A $338K cabin at $305 a night, 64% booked, with an 18% co-host. It nets $194 a month after fees, cleanings and the mortgage.

WHERE IT BREAKS

Below 60.4% occupancy, cash flow goes negative. That's a thin cushion.

HOW THEY WORK

06

Load an example. *Make it yours.*

- Every number updates as you type
- A stress test shows the input most likely to sink the deal
- Free, with no sign-up

Find the breaking point *before you offer.*
